West Haven, CT

PROFESSIONAL SUMMARY

Computer Science graduate student at the University of New Haven (2026) with 1+ year of professional software engineering experience. Skilled in Python, SQL, JavaScript, and data-driven application development. Proven ability to build ETL pipelines, REST APIs, and ML-powered systems. Seeking a Data Analyst or Software Engineer role where I can translate technical work into measurable business outcomes.

EDUCATION

M.S. in Computer Science | University of New Haven, West Haven, CT 2024 – 2026

B.E. in Computer Science & Engineering | Hindusthan College of Engineering and Technology, Tamil Nadu, India 2020 – 2024

PROFESSIONAL EXPERIENCE

Software Engineer | Friends Fabs, Tamil Nadu, India (Hybrid) Aug 2023 – Aug 2024

- Built and maintained 5+ responsive web applications using JavaScript, Vue.js, Node.js, HTML, and CSS, improving UI consistency across the product.
- Designed and integrated REST APIs enabling seamless frontend-backend communication, reducing data latency by ~15%.
- Developed SQL database schemas and ETL pipelines to manage and transform application data, supporting reporting for 3+ internal teams.
- Built Tableau dashboards and Excel/Jupyter Notebook reports to surface business insights for stakeholders.
- Collaborated with distributed teams via Git and Agile (sprint planning, code reviews), contributing to on-time feature delivery.
- Assisted in Android app development using Java and XML; supported AWS-based cloud deployment tasks.

INTERNSHIP EXPERIENCE

Software Development Intern | Friends Fabs, Tamil Nadu, India Feb 2023 – Jul 2023

- Assisted in building web applications using HTML, CSS, JavaScript, and Vue.js alongside backend tasks in Node.js and SQL.
- Participated in API integration, testing, and debugging; contributed to data analysis and reporting using Excel and Jupyter Notebook.
- Gained hands-on experience with Agile workflows, Git version control, and the full software development lifecycle.

Android Developer Intern | Verzeo Edutech, Remote Jul 2022 – Aug 2022

- Developed and enhanced Android applications using Java and XML; integrated REST APIs and managed database interactions.

PROJECTS

Focusticks — Android Productivity App | Aug – Dec 2025

- Built a full-featured Android productivity app with focus timers, task tracking, and streak-based motivation system using Java and XML.
- Designed a responsive UI with optimized local data storage; published to internal testing with 50+ active users.

AI-Driven Portfolio Management System | May 2024

- Developed an ML-powered system for market trend analysis and asset allocation using Python (pandas, scikit-learn) and structured financial datasets.
- Applied classification and regression algorithms to generate data-driven investment insights; achieved ~82% prediction accuracy on test data.

Sign Language Detection System | *Dec 2023*

- Built a computer vision model (CNN-based) using Python and OpenCV to recognize American Sign Language gestures in real time.
- Trained on a dataset of 5,000+ labelled images; achieved 89% accuracy; improved accessibility for hearing-impaired users.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript

Data & Analytics: pandas, NumPy, Tableau, Excel, Jupyter Notebook, MySQL

Web & Backend: Vue.js, Node.js, HTML, CSS, REST APIs

AI / ML: Machine Learning, Computer Vision, scikit-learn, AI-driven solutions

Mobile: Android Development (Java, XML)

Cloud & Tools: AWS (Cloud Practitioner), Git, Agile/Scrum

Concepts: OOP, Data Structures, ETL Pipelines, Data Modelling

CERTIFICATIONS

AWS Cloud Practitioner (Foundational) • Python & SQL for Data Science — SCALAR • Java & JavaScript — Profenaa Tech • Python, HTML, CSS, MySQL — Solo learn
